

**We develop and
package your projects**

Instant Procès S. L. was founded in 1998 with the aim of manufacturing and packaging coffees, tea and instant soluble products in the field of food and dietary supplements as a 3rd party.

Currently, our know-how, team and facilities allow us to offer a more comprehensive service, focusing on developing new products and improving **manufacturing processes and packaging**.

Our services cover the entire innovation process, from a brain storming **to manufacturing and packaging the final product**, taking into account Regulatory issues, labeling, packaging, print design or training for commercial teams, following **strict quality standards and continuous improvement**.

Our facilities are continuously improving and adapting to new formats and production needs, ensuring **product safety** and are approved by renowned pharmaceutical companies.

Our large experience developing and manufacturing to our partners **allows us to be flexible and agile**, adapting their needs providing them products that increase their sales volume.

Our customers include pharmaceutical companies, food industry, well-known companies of dietary or herbal products and world-renowned chefs.

Tell us your project and will become a good project

Project Development: from your idea or need, we will apply the required technical knowledge, our expertise and our innovative capacity for a competitive and quality product.

Blend manufacturing: we offer our knowledge, personnel and facilities for the production of your Blend, from the product developed or an existing formulation, for subsequent packaging or bulk delivery.

Package: we are continually adapting our facilities to provide new packaging systems to cover your needs. See our standard formats in our website. We will advise you in material terms or most appropriate formats, as well as the packaging design.

Logistics: space available to offer the benefits of outsourcing your logistics and control of all materials and safety stocks.

Specific trainings to sales teams : our tasting room is optimal to train commercial or technical teams and provide it with the necessary sales pitches or specific product knowledge.

Development of technical files: our technical team offers preparing technical dossiers about final products, specific ingredients or specific legislation that trade your marketing or sales departments or also allow them to notify or register the products.

Engineered and special works: at the launch time or in a sales promotion, we can help you with special packaging or handling, preparing samples, special packaging or shrink-wrapping.
